Shane:

There have been no new industries or other new significant dischargers to the Shumaker treatment system since the WER study performed in January, 2007.

There have been no changes to the operation or treatment system since the WER study performed in January, 2007.

If you have any additional questions or need any additional information, please contact me.

Fred,

Couple of questions:

Has Shumaker taken on any new industries or contributions to the treatment system that would affect the influent characteristics since the WER study was performed in January 2007?

Has there been any changes in plant operations or treatment system changes since the WER study was performed in January 2007?
